## ULTIMATE SECURITY

- 'Pro-Bi' high security padlocks and cylinders are engineered to withstand aggressive physical attack.
- Hardened Pins in the Bi Lock cylinder, combine with the Hardened Boron Alloy Shackle to offer superior protection against cutting and sawing. The shackle provides almost 7,000 kg of cut resistance.
- The Dual Ball Bearing locking system secures to the Bi Lock cylinder to offer up to 6,000 kg of protection against pulling, prying and hammering.
- The Solid Iron Shroud offers tough, armoured protection against bolt cutter attacks.
- The Laminated Steel Body is constructed with reinforced, interlocking steel to resist impact.
- The Pick Resistant Hardened Pins of the high security Bi Lock keyed cylinder offer genuine pick resistance.

*Because the Master Pro-Bi Lock series is totally compatible with the Bi Lock Master Key System, the same key that opens for instance, your doors, filing cabinets, lockers and safes, can now open ultimate (padlocked) perimeter security.*

## GREATER WEATHER RESISTANCE

- The 'Pro-Bi' series 'weather resistant' range of locks are designed to endure harsh outdoor environment.
- The Hardened Boron Alloy Shackle is triple plated to resist rust and corrosion and is strong enough to provide high security protection.
- The Flow Through Debris Channels are unique internal design channels to move water and debris away from the locking mechanism for trouble free opening.
- The Estone Seals keep the locking mechanism free from moisture, dirt and other contaminants which can cause cylinder jamming.
- The Xenoy Thermoplastic Cover protects the body and keyway from sand, dirt and other contaminants.
- The Cylinder Cover prevents dust, dirt and other contaminants from entering the cylinder and jamming the key mechanisms.
