

From the smallest pistol to the longest rifle...

The Australian Lock Company Pty Ltd, one of Australia's leading high security lock manufacturers with two Australian Design Awards and numerous business excellence awards now introduces the ARMSAFE gunlock range.

ARMSAFE fits any make or model on today's market!

The patented design allows for safety during: storage transportation and handling!
It offers Bi Lock Security, takes less than a minute to install and the same to remove.

Endorsed by ASIO (Australian Security and Intelligence organisation's) for achieving the highest possible security rating in Australia, Bi Lock is one of the most preferred high security locking mechanisms. It is easy to see why the Armsafe gunlock is gaining significant and genuine endorsement as the most effective mean of preventing unnecessary gun-related accidents and death. Armsafe was used by the ICAC (Independent Commission Against Corruption) and was specified for the safe storage of firearms of police, witnesses and security staff.

Just 4 Easy Steps!

1. Place dummy case in breach and close action
2. Insert threaded rod in barrel and screw into case
3. Place lock over barrel end, insert key, lock into rod
4. Return Key to vertical. Remove key
