

Lock up you boat, caravan, horse float...

The Talon range can secure your trailer both on and off your stationary vehicle with the simple turn of a key. The lock is fully cast from the toughest grade of stainless steel and features the renown Bi Lock high security cylinder, with a key system that is both tamper proof and pick resistant. The lock is convenient to use, taking less than 30 seconds to install and detach from your trailer. It is rust and corrosion proof and will surely last a lifetime. It carries comprehensive guarantees of quality and has been approved by motoring authorities across Australia.

Hitch Lock

Secure your hitch into the back of your vehicle with the Talon Hitch lock. The stainless steel pin has a machined groove on the end which is secured in place with the Bi Lock high security cylinder. The dust cap pushes into the key-way and an "O" ring inside the cylinder assists in preventing water and dust from entering. Put the Hitch lock in place and leave it there whilst driving. No more worries!

Trailer & Hitch Package

What better way to protect your investments - be the boat, caravan, work trailer or horse float, than with the package set from The Australian Lock Company. This set comprises of the Talon Trailer lock, which secures your trailer both on and off your hitch with the simple turn of a key, and the Talon Hitch lock, which will secure your hitch into the back of your vehicle. With ever increasing numbers of caravans, boats, and trailers stolen every day from backyards, boat ramps and outside homes, the wisest decision you could make is to own this package set today.

4WD Treg Lock

For 4WD enthusiasts, here is the ultimate security package. Simply slip the Treg lock pin into the coupling and attach the Bi Lock security cylinder onto the machined end. With a turn of a key, your possessions are secure. Why not also key-up to your 4WD the added security of a Talon Hitch lock? See us today for a package set!

Hitch & 4WD Treg Lock Package

The Talon 4WD security set comprises of a Hitch lock, which secures your hitch into the back of your vehicle and a Treg lock which simply slips through a boxlike coupling and is locked on the machined end with a Bi Lock high security cylinder. The hitch lock is keyed up to the same serial number, so you only need one key to operate both products. Simple! Now you can leave your trailer for a few days while you take off on that fishing trip, knowing your ride home will be there when you get back with your record catch!
